

Limited Period Golden Offer **PathoGoldCloud LIS**

(Online Laboratory Management Information System)

**Add 3 machine Interfacing.
(With Any PathoGoldCloud Plan)**

**Super
Deal**

**With Any Plan, you can add
3 Machine Interfacing (1 BD, & 2 UD)**

UD=Unidirectional, BD=Bidirectional

**Data from the Lab Instrument will be
directly captured in the PathoGoldCloud
software**

**You can also EDIT the captured.
Values easily**

**GRAPHS from the Machine can be
attached as a PICTURE with a report.**

**This is a true VALUE FOR MONEY Deal
for you**

How it works

BD Interface

Register a Patient -> Collect Sample -> Paste Barcode on Vial -> Place Vial in the machine -> Results will directly appear in the test format -> You can edit those results if required -> Print a Report

UD Interface

Register a Patient -> Collect Sample -> Type last 5 digits of patient ID on machine -> Run a sample -> Results will directly appear in the test format -> You can edit those results if required -> Print a Report

IF A MACHINE CAN READ A BARCODE, YOU CAN CREATE BARCODED VIALS, THEN NO NEED TO TYPE ANY PATIENT ID ON THE INSTRUMENT, JUST SCAN THE BARCODE

**NOTE THAT TO DO BIDIRECTIONAL INTERFACING, YOU
MUST HAVE A BARCODED VIAL**
